DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's response filed 09/09/05 in reply to the Office action of 03/09/05 has been entered. The IDS of 10/10/05 has been considered. Claims 1-2, 10 and 11 are pending and are examined.

All previous objections and rejections not set forth below have been withdrawn in view of Applicant's amendment and/or upon further consideration.

Claim Rejections - 35 USC § 112

Claims 1-2 and 10-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. This rejection is repeated for the reasons of record as set forth in the last Office action of 03/09/05. Applicant's arguments filed 09/09/05 have been considered but are not deemed persuasive.

Applicant asserts that the claims are enabled given the confirmatory data provided in the instant response and the newly cited references by Jia et al (J. Exp. Botany 53:2201-2206 (2002)) and Smet et al (Plant Journal 33:543-555 (2003)) which provide evidence that one skilled in the art would be able to use Applicant's SEQ ID NO:1 or 2 to induce salt stress tolerance in transgenic plants. (response, pp 3-6).

Art Unit: 1638

These are not persuasive for the following reasons: firstly, the experimental data provided on page 4 of the response should have been presented in the form of declaration under 37CFR 1.132. Secondly, it is unclear from Applicant's response as to whether the experimental method used for producing transgenic rice with improved lateral root growth as compared to the control lines plants is similar to the method described in Applicant's specification. The MPEP 716 states "(w)hen any claim of an application is rejected or objected to, any evidence submitted to traverse the rejection or objection on a basis not otherwise provided for must be by way of an oath or declaration under 37 CFR 132." Therefore, the data is insufficient to obviate the rejection. Thirdly, the publication date of each Jia et al (2002), Smet et al (2003) and Xiong et al (2003) reference is after the filing date of the instant specification, thus the references cannot be used to satisfy enablement requirement. Also, MPEP 2164 (.05) states "publications dated after the filing date providing information publicly first disclosed after the filing date generally cannot be used to show what was known at the time of filing. See also, Genentech Inc., 363 F.3d 1247, 1254, 70 USPQ2d 1321, 1325-26 (Fed. Cir. 2004) .

Therefore, for all the reasons discussed above and in the last Office action of 03/09/05, the claims fail to satisfy the enablement requirement under 35 U.S.C. 112, first paragraph. Therefore, the rejection is maintained.

Applicant is invited to provide the data presented on page 4 of the response in the form of declaration under 1.132 to support the stress tolerance activity of SEQ ID NO: 1 upon expression in a transgenic plant. See MPEP 716 and 37 CFR 1.132.

Remarks

Claims 1-2 and 10-11 are deemed free of the prior art of record because the prior art does not teach or reasonably suggest SEQ ID NO: 1 or a nucleotide sequence encoding SEQ ID NO: 1, as stated in the last Office action.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
